

# FREEDOM TO ROAM

The Swedish Right of Public Access gives everyone the right to roam freely in nature, including on private land, for instance to pick wild berries and mushrooms. You are allowed to walk across private property to access fishing waters, and to temporarily use a jetty if it is situated outside a private plot. You are allowed to access the shore, swim and temporarily moor a boat at a beach that doesn't belong to a private plot and isn't a protected bird habitat. You can also pitch a tent for a couple of days in the wild. Don't leave any rubbish and be careful if you light a fire. In protected natural areas, special rules apply that are displayed for visitors to read at the site. For more information about the Swedish Right of Public Access, visit [naturvardsverket.se](http://naturvardsverket.se)
